Early-career full-stack developer eager to expand my engineering prowess by rapidly learning new tools and methods. Looking to transition to an opportunity in a dedicated technology company, where I can hone my skills, collaborate with high-performance engineering teams, and be on the front lines of emerging technologies such as AI and cloud computing.

SKILLS

HTML, CSS, JavaScript, React, Node.js, Express.js, C#/.NET, Python, TypeScript, SQL, MongoDB, Next.js, RESTful APIs, Git, CI/CD (Github Actions), Jest, AWS, Azure, Agile methodologies, AI-assisted development (Github Copilot, Replit)

EXPERIENCE

Engineering Associate
Wells Fargo | Charlotte, NC   **Jan. 2024 – Present**
- Design and deploy compliant, secure solutions for complex business needs largely using C#/.NET and SQL queries, ensuring SDLC alignment and successful project execution.
- Provide support to the Commercial Real Estate department under Commercial and Corporate & Investment Banking Technology.
- Collaborate with my team to resolve technical challenges, implementing solutions that improve project outcomes and user satisfaction.
- Support compliance efforts by completing KTLO tasks, maintaining up-to-date application documentation, and facilitating communication between teams to ensure smooth operations and departmental alignment.

IT POS Support
Levy Restaurants | Charlotte, NC   **July 2023 – Present**
- Point-of-sale support for Levy Restaurants, a subsidiary of Compass Group
- Install, operate and maintain over 800 computer systems and other technologies at Bank of America Stadium (Carolina Panthers) and Spectrum Center (Charlotte Hornets)
- Maintain functionality of hardware systems by Oracle, Legacy, Quest (NCR), Ingenico, and VenueNext.
- Promptly execute on debugging software.

FEATURED PROJECT

Work and Chill
https://workandchill.io/
- Workplace entertainment platform where companies browse and order virtual experiences for employees.
- Built for a non-technical founder with a fast-growing startup that serves several fortune 500 companies.
- Built on Replit using React, TypeScript, Node.js, Express.js, and a PostgreSQL database. Payment processing is achieved using the Stripe API.
- Includes an admin dashboard for the Work and Chill team to manage experiences, categories, bookings, discount codes, and add-ons.

EDUCATION

University of California, Berkeley, Extension
Full Stack Web Development Boot Camp Certificate | Berkeley, CA
A 24-week intensive program focused on gaining technical programming skills in HTML5, CSS3, Javascript, JQuery, Bootstrap, Node.js, MySQL, MongoDB, Express, GraphQL, and ReactJS.

University of Alabama
Computer Science/Creative Media | Tuscaloosa, AL

Hopewell High School - Academy of Engineering
Huntersville. NC
